Thanks, Shari. I like your alternative.

Understood – there is a lot of information (but I assume we are more interested in their findings than the other way around).

An alternative would be to do the slide on our process, then present the geologic topic areas (i.e., structure, faults, USDWs, confining zone, etc.) as an “outline” to guide the call – a 2 slide presentation.

Or, we’re happy to mostly listen (or speak up on any of these points if you ask us to).

Hi Shari,

I spoke to David this morning about the presentation. The only comment he had was that the information seems dense and could easily turn into a 30-minute presentation/discussion. To avoid that, we will have the state present their comments/findings on the application first. If there is sufficient time left, we can cover all the slides, otherwise, we can go over the review process and briefly mention the findings.

We would like Cadmus to do this presentation verbally without showing the slides.

Please let us know if you have questions.

Thanks,
Calvin

Thanks, Calvin.

I'll wait to hear if David has comments and then transfer to the EPA template.

Hi Shari,

The slides look good to me. Please use the EPA slide template.

I forwarded the slides to David and will let you know if he has comments.

Thanks,
Calvin

Hi Calvin

Attached are draft slides for the talk with CalGEM on the CES application on Monday. Please let me know if this is what you had in mind for our presentation. Since the state has been looking at the same application, we didn't focus on restating the information provided in the application, and instead focused on how we will ensure that the pre operational testing will fill in data gaps.

Please let me know if you have any comments or wanted anything else. Also, should we use the EPA slide template? I didn't want to presume that we should, but the attached is pretty sparse.

This main purpose of this call is to let the State provide their comments/findings on the application. I suggest the presentation focuses on the findings. However, a slide that talks about the process may provide the State some insights for C6 app review. Thanks. Calvin

We can do that, Calvin.

Do you want us to focus on process, findings, or something else? What background does CalGEM need? There isn't much to say yet about the AoR modeling (other than the process), which we can devote a slide to.

Let me know if you'd like to discuss.

Subject: [EXT] presentation for 8/10 call with CalGEM and WB

Hi Shari,

For the 8/10 call with the State regarding the CES C6 permit application, can Cadmus prepare a brief presentation (3-4 slides?) on the review of site characterization, and possibly on the initial review of AoR modeling. Please let us know if you have other ideas.

Thanks,
Calvin
